40 Years Full of Pride in the MDF Sector

Since 1984, we have been operating in the field of construction, which is the leading sector of our economy, in order to meet our world-class quality material needs and to become a competitive actor in global markets in product quality.

We are aware of the responsibility we assume with a production approach that constantly follows the developments in the sector and respects the environment. Having performed MDF production as the first factory in Türkiye, Middle East and Balkans, and the fourth of in Europe, we continue our operations with great faith, proud of deserving the privilege of being the first name that comes to mind abroad as well as domestically when you say MDF.

**Best regards,
Chairman of Board of Directors**

Hakan Poyraz
